

Regional & nat'l broadcasters do not do much for the local community, but neither do the local broadcasters. Most people watch TV to get their news. A friend moved his advertising from radio to TV and his sales went up 30%. Tell me that people listen to the radio for local issues and I will sell you some oceanfront property I own in Arizona. Giving a local broadcaster rights over a larger broadcaster should not be the case. A LPFM station should not have more rights than a FM translator.
